CONGO (BRAZZAVILLE) [ADVANCE RELEASE]

THE MINERAL INDUSTRY OF CONGO (BRAZZAVILLE)

By James J. Barry

In 2019, the economy of Congo (Brazzaville) was based largely on the production of crude petroleum (Organization of the Petroleum Exporting Countries, 2020, p. 10). The legislative framework for the mineral sector in Congo (Brazzaville) is provided by law No. 4–2005, Decree No. 2007–274, Decree No. 2007–293, law No. 24–1994, and Decree No. 2008–15. Data on mineral production are in table 1. Table 2 is a list of major mineral industry facilities. More-extensive coverage of the mineral industry of Congo (Brazzaville) can be found in previous editions of the U.S. Geological Survey Minerals

Yearbook, volume III, Area Reports—International—Africa and the Middle East, which are available at <https://www.usgs.gov/centers/nmic/africa-and-middle-east>.
